Dr. Eric Richard Christian
High Energy Cosmic Ray Group NASA/Goddard Space Flight Center

"A TIGER in Antarctica"

Recently the TIGER (Trans Iron Galactic Element Recorder) balloon-borne cosmic-ray instrument had a record-breaking flight from Antarctica. The science of TIGER is heavy (elements heavier than iron) cosmic rays, and what they can tell us about the origin of cosmic rays. Dr. Christian will talk about heavy cosmic rays, and also what it is like to do science in Antarctica.
